

Product flash association - Categories

Developed by : Dream me up (www.dream-me-up.fr)

Module overview

A single interface to quickly create/modify product categories and improve the customer experience on your e-commerce site! Extremely practical for creating one-off selections in a matter of moments (like your Christmas selection, for example)!

The benefits

-  **Improve the user experience on your e-commerce site and make your product offering more attractive!**

A must for boosting your store! With the help of the module developed by Dream me up, your customers will have access to a range of relevant products that will encourage their engagement. The right mix of products in each category will boost your sales. But also, your overall visibility, since customer curiosity will be heightened and satisfaction optimized.

-  **Save time organizing your products by category**

Do you have more than 100 products? Would you like to control the association of your products with your categories? This module is for you!

Quickly associate and de-associate your products with multiple categories :

- In a single interface, entirely ajax-based (no page reloads), consult the products associated with a category.
- Search for products and add them to the desired categories in just 1 click.

Avoid the tedious step of going back into each product file to select category associations.

This module is ideal for making product selections for special events (Valentine's Day, Christmas, etc.), promotions and more. Or if you have manual product selections on the home page, such as the featured products module.

You can also control the default category of your products directly using the icon on the right.

-  **Optimized clarification**

Use filters to quickly select products for editing or not :

- ❖ **Simple** : Integrate a product or several products into a category in 1 click,
- ❖ **Enhancing** : Ensure product consistency within each category,
- ❖ **Fast** : Classify your products easily with drag & drop,
- ❖ **Efficient** : Boost the visibility of certain products (best sellers, new products, popular or recommended products, products on sale, etc.).

Thanks to optimized clarification of your product offering within your categories, make your e-commerce site more attractive!

Features

This module provides a single interface for :

- Associate one or a selection of products with a category
- Unassign one or more products from a category
- View and modify the default category for each product
- Move a selection of products from one category to another
- Change the order of products in a category by drag and drop
- Filter products by category, brand, product name, reference

Installation

Copy the files into PrestaShop's "Modules" directory. Once installed from your administration area, pull down the "Catalog" menu, then click on "Category Associations".

Recommendations

Our guarantees:

We are a PrestaShop agency with a team of experienced PrestaShop developers.

We are committed to responding quickly to user requests and providing quality service.

We aim to provide **100% customer satisfaction** with their purchase.

We will also help you with the installation and configuration of the module should this be necessary.

✓ **Please feel free to rate and leave feedback on our modules and support.** This helps us in the development of new modules and the improvement of already developed modules.

If you have any questions about our module, please send us a message. We'd be more than happy to help.

Using the module

About the developer

A PrestaShop partner since 2011, **Dream me up** masters all technical aspects of e-commerce sites based on this leading solution. Dream me up masters and designs modules mainly in the back office and specializes in the creation of modules designed to **improve the e-merchant's user experience**.

The challenge is twofold: to **save e-merchants time in their day-to-day management**, and to offer **greater visibility of their business**. Thanks to our modules, you'll be able to:

1

Manage your site efficiently and save time

Tired of all those repetitive, time-consuming tasks on PrestaShop? Save as much time as possible with our selection of modules specially designed for you !

2

Monitor your activity

Get to know your customers better and identify their needs with our monitoring tools. Control your business in just a few clicks with our monitoring modules and improve your PrestaShop experience !

3

Improve your store

Enhance your users' experience by offering them new tools with our PrestaShop modules. Meet their needs with viral marketing and e-marketing tools!

4

Enhance your administration tools

Enhance your experience as an e-retailer by using our selection of modules to enrich PrestaShop's CRM and ERP functions. These advanced tools will enable you to interface with other accounting software and optimize your sales management.

Discover our other online modules, essential for managing your online store: quick product administration, easy associations, real-time statistics, marketing tools, etc.
